NEW BUSINESS

Resolution to Award Bid for the Wastewater Treatment Plant Phase II Project.

Assistant Utilities Superintendent, Eric Gossett, reported that This project is aimed to meet the stringent limitations of the new wastewater treatment plant permit. Additionally, the project will also address hydraulic retention and future economic development. The current plant cannot meet these limitation or receive additional flow from large industrial users. Phase I of the project addressed aged and dilapidated infrastructure in the sum of approximately \$10 M to include parts of the major wastewater trunk line. This project was advertised for 30 days on both the City’s website and Georgia Procurement registry. Statements of qualifications were opened on March 6, 2025, for the above referenced project. There were six (6) interested proposers, and three (3) proposals were received. Carter and Sloope was determined to be the most qualified to perform the services. This contract will take place for a duration of approximately four years or completion of construction. Additionally, the City will be taking a construction management at risk (CMAR) approach for this project. Therefore, it will require two contracts with Carter and Sloope. One for CEI and the second for owner adviser services. Both contracts are pending legal review. It was recommended that the City Council adopt a resolution that would award the contract for the Wastewater Treatment Plant Phase II Project for design, construction management, construction engineering and inspections services and owner’s adviser services in the sum of not to exceed \$4,181,285 and to authorize the Mayor or Mayor Pro Tem to sign all the required paperwork to execute both contracts. The following is a summary of the proposals received.

Motion to adjust Water and Wastewater Rates and Fees FY 2026.

Assistant Utilities Superintendent, Eric Gossett, reported that the current debt service ratio and cost recovery ratio is below the required and recommended numbers. The current debt service ratio for wastewater is 0.99. The City of Thomasville’s financial policies state the organization will maintain a 1.25. This means that the organization’s net

profits are much lower than the annual debt service. Additionally, the organization’s cost recovery ratio is 1.18 and the recommended ratio is to be between a 1.20 to 2.50. Also, incorporating of two connection fee schedules between the city and county limits would promote the infill of the city limits. The requested rate increases would impact the city commercial, county residential and county commercial rate classes. It is requested to increase city commercial by three percent and wastewater by five percent, county residential water by five percent and wastewater by seven percent and county commercial water by five percent and wastewater by seven percent. There is not a requested rate increase on the city residential rate class. These increases would move the debt service ratio to 1.28 and the cost recovery ratio to 1.21. Additionally, it is proposed to create two connection fee schedules for the city and county limits. This would assist in promoting infill within the city limits. In return, this could reduce the cost of building homes. Assistant Utilities Superintendent Gossett reviewed a PowerPoint presentation which included the current rates and fees; proposed rates and fees; the separate connection fee schedule for the city and county; and a review of water and wastewater infrastructure within city limits and outside the city limits.

| Rate and Fee Increases for Consideration: | <u>Water</u> | <u>Wastewater</u> |
|---|--------------|-------------------|
| City Residential | 0% | 0% |
| City Commercial | 3% | 5% |
| County Residential | 5% | 7% |
| County Commercial | 5% | 7% |

REPORTS

Councilmembers collectively thanked those members of the community who attended and signed in to speak and thanked the Women Veterans for their service to their country.

Regarding concerns about the City creating more Pickleball courts, Councilmember Baker reported that other cities, such as Moultrie, have a property millage rate that supports their recreation, while the City of Thomasville relies on SPLOST dollars for recreation. He further noted that the SPLOST dollars are split several ways to benefit the Thomasville community, some of which include funding that is disseminated to the smaller town of Thomas County for recreation. Councilmember Baker noted that the comments made at this meeting are being heard. Councilmember Brown noted there are financial challenges that Council must work through for the entire community and currently there are several projects that are taking precedence over others due to the deteriorating shape of infrastructure. Councilmember Chastain noted he was a big proponent of recreation within the community and further noted it was the Council's responsibility to respond to the needs of the community; however, the majority of the SPLOST dollars

are spent on road resurfacing and capital projects. He noted he was in favor of a T-SPLOST as a means to help alleviate transportation needs and provide for additional SPLOST dollars to be used for recreational needs.

ADJOURNMENT
