Section 2-191 Calculation of benefits.

When a member shall retire as a matter of right, he shall be paid each month thereafter for the rest of his life an amount which is calculated as follows:

Thomasville Municipal Code
last amended 1-22-14

(a) For Class A members. Unless they elect to receive benefits available to Class B members as provided in section 2-189(b), the normal retirement benefit for Class A members shall be one and one-half percent (1.5%) of average monthly salary received by the member during the best three (3) consecutive years out of the ten (10) years immediately preceding retirement, multiplied by his number of years of employment.

(b) For Class B and Class C members. For members who retire under section 2-189 (c) the normal retirement benefit shall be calculated by adding the figures obtained from the calculations in subsections (1), (2) and (3) below and multiplying the total sum by the number of years of employment:

(1) One percent (1.0%) of average monthly salary received by the member during the best three (3) consecutive years out of the ten (10) years immediately preceding retirement;

(2) Six-tenths of one percent (0.6%) of such average monthly salary in excess of one thousand seven hundred twenty-eight dollars and seventy-eight cents (\$1,728.78);

(3) Six-tenths of one percent (0.6%) of such average monthly salary in excess of three thousand nine hundred eighty-nine dollars and fifty-nine cents (\$3989.59).

The salary break points used in these calculations shall be increased or decreased on January 1, 2004, and on every January 1st and July 1st thereafter based upon the percentage increase or decrease of the average Consumer Price Index (CPI-U) for all items (1984 = 100), or successor to that Index, as published by the United States Department of Labor for the respective periods of the preceding November 1st through April 30th and May 1st through October 31st. Break point calculations shall be brought to the Pension Board by the Chief Financial Officer of the City for approval at the next regularly scheduled meeting of the Board.

(c) When a member shall retire under the disability provision of section 2-189, he shall be entitled to be paid each month, for the duration of disability, a sum computed in the same manner as normal retirement under this section, except that year of service shall be deemed to be the greatest of the following:

(1) The member's years of service at the time of disability;

(2) The years of service that would have accrued to the member had he worked until age sixty-five (65), but not to exceed twenty (20) years; or

(3) The years of service that would have accrued to the member had he worked until age sixty (60).

If the number of years of service determined in subsections (c)(2) and (3) above exceed the number of the member's years of service at the time of the disability, during such period the member shall be deemed to have received the salary at the time of disability for purposes of computing monthly average salary. If the years of service determined in the immediately preceding paragraph exceed the member's years of service at the time of disability, during such period the member shall be deemed to have received his last completed year's salary for the time granted due to his disablement for purposes of computing his average monthly salary.

(d) It shall be the obligation of the member to supply the pension board with all data on Social Security necessary under any previous ordinance for the coordination of benefits in accordance with the benefit formula of such previous ordinance. Failure to supply the necessary Social Security data shall be grounds for withholding payment until the data is supplied.

(e) When a member retires under the early retirement provisions of paragraph (e) of section 2-189, his payments shall be calculated in the same manner as the normal retirement benefit except that years of employment and average monthly salary shall be determined as of the early retirement date. Such benefits shall then be reduced one-half percent (0.5%) for each month the date of early retirement precedes the date of normal retirement. Such reduced benefits, once determined, shall remain constant at the reduced figure for the life of the member.

Thomasville Municipal Code
last amended 1-22-14

(f) Members of the Pension Plan who were retired and were receiving benefits on December 28, 1976, and those Class A and Class B members who retire after that date shall be entitled to post-1984 retirement adjustments in their benefits based on the fluctuation in the Consumer Price Index (CPI-U) as published by the United States Department of Labor.

Benefits shall be adjusted by the average Consumer Price Index (CPI-U) for all items (1984 = 100), or the successor to that Index. The benefits shall be adjusted by the cost-of-living adjustment on January 1, 2004, and July 1, 2004, and each six (6) months thereafter based on the respective periods of November 1st through April 30th and May 1st through October 31st. In no event shall the increase or decrease exceed one and one-half percent (1.5%) for each six (6) month period. The beginning price index shall be the average price index of the six-month period during which retirement takes place. No adjustment shall reduce the member's benefit below those earned under the standard benefit formula. Notwithstanding anything contained in this Plan to the contrary, Class C members are not eligible for the post-retirement adjustments described in this section (f). Break point calculations shall be brought to the Pension Board by the Chief Financial Officer of the City for approval at the next regularly scheduled meeting of the Board.

(g) A member who retires as a matter of right under section 2-189 may elect to have his or her benefits made payable in a reduced amount for life and in a lesser amount thereafter to a surviving spouse for life. Written notice of a survivor annuity of fifty percent (50%) or less must be filed upon a form prescribed by the Pension Board at any time prior to retirement. Written notice of a survivor annuity of more than fifty percent (50%) must be filed on a form prescribed by the Pension Board no earlier than sixty (60) days and no later than fifteen (15) days prior to retirement. In the event of such election, the amount of benefits otherwise payable under this plan to the retired member and the amount payable to the surviving spouse shall be determined by the actuarial table in effect at the time of retirement. Such table shall be the latest approved by the city's actuarial consultant and the pension board. A member who has elected this option and has been approved by the board may revoke his election by written notice to the board up to the day of his retirement. In the event of the death of a spouse prior to the retirement of a member, such an election shall be deemed to be revoked automatically. Upon the date of retirement the election shall become irrevocable and the retired member's pension shall be in the reduced amount, henceforth, regardless of whether his spouse survives him.

(h) Members retiring as a matter of right under section 2-189(c) or (e) may elect to have his benefits made payable on a levelized basis considering a combination of city pension and Social Security which is determined to be of equivalent value to his accrued benefit using the actuarial assumptions described in this section at the time of retirement. The purpose of this provision is to enable the member to receive, from this pension plan and under Social Security, an aggregate income in approximately level amount for life.

(i) For the purposes of this section, a member's average monthly salary shall be determined exclusive of overtime. Salary shall include merit or other bonuses received for the performance of duties, but salary shall not include special award or incentive payments such as the wellness incentive program, the employee suggestion awards program, and the like.

(j) The actuarial assumptions shall be defined as follows:

(1) Mortality assumption for a member who is not retiring under the disability provision of section 2-189 shall be the most current annuity mortality table as approved by the City's actuary and as described in the Internal Revenue Service's Revenue Ruling 95-25.

(2) Mortality assumption for a member who is retiring under the disability provision of section 2-189 shall be the most current annuity mortality table as approved by the City's actuary and as described in the Internal Revenue Service's Revenue Ruling 96-7.

(3) Mortality assumption for the spouse of a member shall be the most current annuity mortality table as approved by the City's actuary and as described in the Internal Revenue Service's Revenue Ruling 95-25.

Thomasville Municipal Code
last amended 1-22-14

(4) The net investment yield, compounded annually, shall be determined based on actuarial assumptions as calculated annually. The semi-annual cost of living adjustments for Class A and B members shall be calculated and compounded semi-annually by the City Treasurer.

Section 2-192 Death before receiving benefits.

(a) Should any member of the Pension Plan, who has ten (10) or more years of membership in the Pension Fund, die while still in the active employment of the City, the surviving spouse of the member will be entitled to a pension. The amount of pension shall be the equivalent of the benefit calculated at a 100% survivor's option. The accrued benefits will be calculated as for normal retirement but will reflect the years of service and average salary at time of death. The benefits, so calculated, shall be payable for the survivor's lifetime or until he remarries. The survivor who is entitled to benefits under this section may elect to receive a refund of contributions, as covered under paragraph (b), in lieu of a pension if he so desires.

(b) Should any member die without actually receiving any cash benefits hereunder and have less than ten (10) years of service in the Pension Fund or have no surviving spouse entitled to receive benefits under subsection (a), the amount he has contributed to the Pension Fund, plus interest, shall be paid in a lump sum to his heirs at law, or to any person designated by such member in writing before his death.

(c) Should a retired member die without having received in pension benefits a sum equal to the amount he has paid into the Pension Fund plus interest to the date of retirement, and not have a surviving spouse designated to receive a pension, then the difference between the amount paid plus interest and the amount received by the member shall be paid to his heirs at law or to the person designated as beneficiary by the member in writing before his death.

(d) Interest will be calculated as follows:

- (1) Two and one-half percent (2.5%) for the period of time prior to 1971;
- (2) Four percent (4.0%) from January 1, 1971 through December 31, 1976;
- (3) Five percent (5.0%) from January 1, 1977, through June 30, 2004.
- (4) Three percent (3%) from July 1, 2004, through December 31, 2004.
- (5) Effective January 1, 2005, interest will be calculated using the applicable Federal long-term interest rate as found in Section 1274(d) of the Code.

All interest will be compounded annually

(Ord of 6-9-08; TQM Code Update - Ch.2, Amended, 10/11/2004; 2-192(d), Amended, 06/14/2004; 1999 (2-192d4), Amended, 05/10/2000; 1999 (2-192), Amended, 02/08/1999(Ord. of 12-23-96(1), § I)

Section 2-193 Refund of contributions and vested benefits.

(a) (1) Any employee leaving the employ of the City before he becomes eligible for retirement under the provision of this division and who has paid assessments to the Pension Fund for a period of less than ten (10) years of service will be refunded the total amount he has paid into the Pension Fund plus interest from the beginning of his membership in the plan as calculated using the applicable Federal long-term interest rate in effect on the date of his termination of employment. If an employee desires to retire under the disability provisions of section 2-189(f), such employee's refund shall not be made until such time as the Social Security Administration has denied his claim for disability benefits. Such refunds shall be with interest from the beginning of his membership in the plan. Interest will be calculated as provided in section 2-192(d). Upon such refund being made or tendered to such person, there shall be no further liability of any kind upon the City or the pension board of trustees.

Thomasville Municipal Code
last amended 1-22-14

(2) Notwithstanding anything contained in subparagraph (a)(1) above to the contrary, a City Manager incurring a break-in-service and who has been refunded the total amount he has paid into the Pension Fund, plus interest, may upon re-employment with the City, remit to the City an actuarially determined amount from the break-in-service until re-entry into the plan. For purposes of this section 2-193(a)(2) the term "actuarially determined amount" shall mean that amount as determined by the actuary employed by the City as that amount to be remitted to the City by the City Manager to provide a calculated benefit pursuant to section 2-191, as if the City Manager had not incurred a break-in-service. The City Manager who is re-employed with the City after incurring a break-in-service shall re-enter the plan upon payment of all actuarially determined amounts as if the City Manager had not incurred a break-in-service. A City Manager who satisfies the plan's eligibility requirement pursuant to section 2-189, but who does not remit to the City the actuarially determined amount after a break-in-service may re-enter the plan on the effective date of membership pursuant to section 2-190.

(b) If a terminating employee has completed ten (10) or more years of service, he shall have the option of:

- (1) Refund of the total amount he has paid into the Pension Fund plus interest from the beginning of his membership in the plan as calculated in section 2-192(d); or
- (2) Retaining a vested interest in the plan unless he has been discharged for dishonesty related to his employment.

(c) If any employee with ten (10) or more years of service does not withdraw his contributions from the Pension Fund, he will be entitled to a vested pension payable at age sixty (60) calculated at one hundred percent (100%) of his accrued benefits. The accrued benefits at time of separation will be calculated as for normal retirement but will reflect the years of service and average salary up to date of termination and will reflect break points in effect at time of termination of employment with the City. An employee resigning or discontinuing membership in the Plan will have his benefits frozen at the time of termination.

(d) If any employee with ten (10) or more years of service, who at termination chooses to leave his contributions in the Pension Fund, should at a later date decide to withdraw his contributions he may do so but interest on these funds as calculated under section 2-192(d), will be only to date of termination of employment.

(e) If any member of the Plan is terminated and is subsequently re-employed by the City, he will be treated as a new employee and his prior service to the City will not be recognized in determining his years of service in the Plan. Notwithstanding anything contained herein to the contrary, if the City Manager's employment with the City is terminated and he is subsequently re-employed by the City, he will not be treated as a new employee and his prior service to the City will be recognized in determining his years of service, but only if the City Manager remits to the City the actuarially determined amount pursuant to section 2-193(a)(2). If the City Manager fails to remit to the City the actuarially determined amount pursuant to section 2-193(a)(2), then and in that event he will be treated as a new employee and his prior years of service to the City will not be recognized.
